

If your child has covid like symptoms with no covid test:

- Child remains home from school and quarantine away from others for at least 5 days **and** symptoms have resolved for 24 hours.
- Siblings in the home will need to remain home from school
- Contact school nurse for directives

If your child lives with someone with covid like symptoms

- All siblings in the home need to remain home from school until the sick person has received covid test results.
- Contact your school nurse.
- ****see household with positive covid below**

If your child is a close contact with someone outside the home

- Stay home from school and quarantine for at least 5 days, monitor for development of symptoms. Strict mask use after 5 days

If your child is covid positive

- Remain home from school and quarantine away from others for at least 5 days starting from onset of symptoms or the date of positive covid test if asymptomatic

If someone in your household is positive for covid

- ****All children remain home from school.** Household contacts should self-quarantine for 5 days **AFTER** date of last contact with covid positive family member.

****Please note that many household contacts will not be able to avoid continued close contact with others in the household. In these cases, persons with covid 19 should stay home and consistently wear a well-fitted mask for 10 days. Household contacts can start quarantine on day 5. With strict mask use, 5 days of quarantine is required. After these 5 days, household contacts can leave quarantine but must continue strict mask use and monitor for development of symptoms for 5 additional days.**

Due to the highly contagious nature of Covid-19, siblings and other household members can develop symptoms several days apart causing the well individual to maintain extended quarantines. Not one scenario can cover the many nuances of covid-19, district nurses will consult with peers and local health department as needed. **Fully vaccinated individuals aged 5-17 that are symptom free do not need to quarantine under the above situations. Booster is required >18r. They will need to self-monitor for development of symptoms for 14 days following contact with confirmed positive case.**
