## Glassboro School District Storage Tank Remediation Update September 19, 2012

The purpose of this letter is to provide an update on recent soil and ground water samples that have been collected at the Glassboro Intermediate School ("Intermediate School") as part of remedial investigation commissioned by the Glassboro Board of Education ("BOE").

Soil and ground water samples were collected by the BOE's environmental consultant in April, May and June 2012 to determine whether soil and ground water was impacted due to a release from a fuel oil underground storage tank that was removed in 1990. This investigation at the Intermediate School is on-going and the BOE will continue to work with its consultants to investigate any soil and ground water contamination at the Intermediate School and will implement additional soil and ground water sampling in the near future. Once the investigation is complete, additional details will be provided.
