

Cannot Locate Student on My PowerSchool Account?

If you have logged into your PowerSchool parent portal and do not see your student listed, or seem to be missing a student or students please contact us at 856-652-2700 extension 6311.

We will review your PowerSchool parent account to verify all of your students are associated with the login you are using. From time to time we see parents who have multiple accounts, using multiple usernames, and each student is listed under a different account. We will help you consolidate the accounts so everything is located in one area.
